[^] Although available in Quebec through its <u>online data dashboard</u>, data on cancer incidence in Quebec after 2010 were not available in the Canadian Cancer Registry at the time of analysis for the report, *Canadian Cancer Statistics 2023*. Quebec projections are calculated differently from the other provinces and territories because actual data were only available to 2010 for Quebec, whereas they were available to 2019 for the other regions. See the source* for details on methods.
